Vishal Sinha

Jr. Web -Application Developer

PROFESSIONAL SUMMARY

"I'm a web developer skilled in both front-end and back-end development. I work with HTML, CSS, JavaScript, Python, and Java to build websites that look great and function smoothly. On the front-end, I focus on creating responsive, user-friendly designs using HTML, CSS, and JavaScript. On the back-end, I work with Python (including libraries like Pandas and NumPy), Java, Node.js, and MongoDB to ensure everything runs efficiently behind the scenes. I love solving problems, exploring new technologies, and continuously improving my skills to deliver better web experiences."
